GOT A VDJ 70 SERIES WITH SERIOUS POWER?

4Terrain
ULTIMATE

AVAILABLE
NOW

PART NUMBER: 4TTSRF2538N

The 4Terrain Ultimate 275mm diameter TWIN PLATE clutch with organic / aramid dual friction plates, and unique patented grooved intermediate plate is here!

Torque rated at over 1600 Nm; this clutch is perfect if you have a customer with a Landcruiser with serious power, who wants complete street driveability, as well as superior off road capability, then this is the clutch to use.

It is supplied complete with a new steel flywheel, slave cylinder, aligning tool and pilot (spigot) bearing. Comes in a unique "munitions box" wooden container.

Part numbered 4TTSRF2538N, this clutch really raises the already high bar of the single plate 4Terrain kit, which is acknowledged as one of, if not the best clutch option for the modified VDJ Cruisers.

Also available (recommended for competition use only) is the 4TTSRF2538N-SSC.

This monster is capable of 2,300 Nm torque drive, and is supplied with all of the above, but with spring centre ceramic button plates and non-grooved intermediate plate.
