## Tow-Pro™ Classic

Quality, Australian made, REDARC Tow-Pro has become one of the biggest selling Electric Brake Controllers on the market. Now there's a REDARC Tow-Pro to suit every towing need and budget.

Introducing Tow-Pro Classic (EBRHV2), the next generation EBRH. The Tow-Pro Classic is based on the Tow-Pro Elite platform incorporating quality and performance improvements whilst retaining the EBRH look and feel.

Simple to install and operate Tow-Pro Classic offers a single (usercontrolled) mode of braking at the turn of a dial with braking force LED indication. Suitable for 12 volt vehicle systems and is AL-KO ESC and Dexter Sway Control System compliant.

Just like the Tow-Pro Elite, the Tow-Pro Classic is able to operate both electric and electric/hydraulic trailer brakes without manual selection.

When it comes to stopping, the Tow-Pro range of brake controllers has a model to suit.

### Electric Trailer Brake Controller

- AL-KO ESC AND DEXTER DSC COMPLIANT
- USER-CONTROLLED MODE
- SUITABLE FOR ALL VEHICLES
- SMOOTH TRAILER BRAKING RESPONSE
- ELECTRIC/HYDRAULIC OPERATION
- COMPACT SIZE
