THE POWER OF
REDARC®

REDVISION
TVMS1280 • TVMSKIT03 • TVMSKIT04

REDARC are proud to introduce the RedVision - Total Vehicle Management System to the Australian Aftermarket.

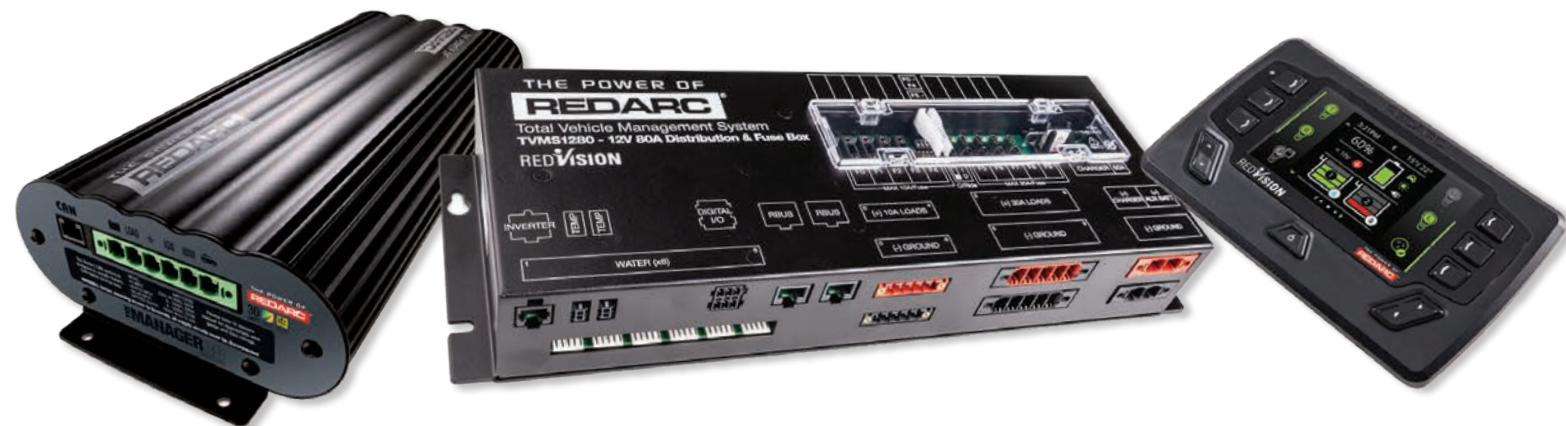

RedVision sets a new level of automation in the Recreational and 4WD industries by bringing information and control right to the user's fingertips. The system allows monitoring of water levels, battery SoC, voltage, temperature and control of various electronic loads connected to the system.

RedVision comes equipped with an in-vehicle mounted display and Bring Your Own Device 'BYOD' smartphone iOS or android app that enables the control and monitoring of many functions in a camper, caravan, motorhome or 4WD in one place.

As part of the aftermarket release a Configurator app is also now available on the Apple App Store and Google Play which allows the configuration and modification of the RedVision installation as well as The Manager if connected. RedVision can be purchased as a standard kit (TVMS1280 - Distribution Box & Display) or as a complete kit featuring either a Manager15 or Manager30, TVMSKIT03 & TVMSKIT04 respectively.

PART NO.	DESCRIPTION
TVMS1280	Display & Distribution Box
TVMSKIT03	TVMS1280 & BMS1215S3
TVMSKIT04	TVMS1280 & BMS1230S2
