THE POWER OF

REDARC®

TOW-PRO™

SWITCH INSERTS

The Redarc Tow-Pro™ Switch Inserts aid the installation of the market leading Tow-Pro™ remote head into vehicles. Feedback from our valued customers showed that installation locations were becoming more difficult to find along with varying dash thicknesses.

To overcome this and make installation of the remote head so much easier, the Redarc Tow-Pro™ Switch Insert allows the installer to create an OE looking remote head mount whilst still maintaining ADR21 compliance when fitted correctly.

PART #	VEHICLE	BARCODE
TPSI-001	Universal	9338628004553
TPSI-002	Toyota Hilux/ Mithubishi Triton	9338628004737
TPSI-003	Holden Colorado	9338628004744

- SIMPLE TO INSTALL
- OE LOOK
- UP TO 7MM THICK PANELS

The Universal switch insert allows for up to 7mm panel thickness and installs with a simple push action. Supplied in the kit, is a drilling template and self-adhesive gaskets for curved dash installations to produce a professional OE looking fitment for the customer.
