

New Product Bulletin 20 2014

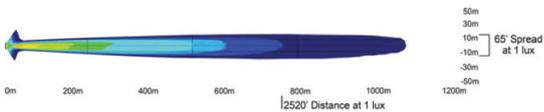

CoolDrive are pleased to announce the further extension in range of the revolutionary LED Technology from Vision X in the Cannon series of LED Driving Lights.

After the recent success of the 4.5" Cannon 25 Watt LED Driving Light, available now is the bigger brother version; the 6.7" Cannon 50 Watt LED Driving Light.

The Vision X 6.7" Cannon LED Driving Light raises the bar, shining over 760m of useable light from a single 50 Watt Luminous LED. It fires more lighting distance with more versatility than most other comparable lights in the market.

A lightweight, high strength Hybrid Aluminium / Polycarbonate housing provides the optimum combination for

enduring the hottest, coldest, wettest and most rugged conditions due to its IP68 Rating. With a universal single bolt mount that is accompanied with a 2 Pin Deutsch Plug and Sockets connectors on 500mm long pre-wired leads.

Available as a separate unit or in a kit of 2 lights, they are also Multivolt 9 – 32 Volt DC, Part numbers are LS7022 for the single unit and LS7023 for the kit which comes with a wiring harness which provides quick and easy installation for a multiple of applications.

LS7023

LS7022

**1000m
useable light!**

It is available in a 10 Degree Spot Beam pattern and it enables Snap on polycarbonate covers that quickly **change the beam pattern from Spot to Euro or Flood**. These translucent covers provide protection against any stone chips or damage from any other debris being kicked up off the road. They are also available in coloured varieties (Clear, Blue, Amber or Red) can improve visibility in various conditions, such as dust, fog or snow. Finished with a glow in the dark printed "X" for a cool look at night when the Cannon are not switched on.
